

DON'T LET IT HAPPEN!

LET SOLLATEK KEEP YOUR VITAL RESOURCES ALIVE

When power fails, so does electrical equipment. Poor mains supplies mean brownouts, utility failures, spikes and surges. Even interference from other devices causes harm. The damage can be permanent. Equipment life is lessened. And your business and home are disrupted.

So buy Sollatek.

For 100% protection against power fluctuations, choose from Sollatek's range of Automatic Voltage Switchers:

- Automatic disconnection when power problem strikes
- Automatic reconnection when power resumes
- Spike/surge protection against lightning and other equipment interference
- Start-up delay safeguards against 'power-back' surges
- Wide range of variants for different environments

Like all our products the Sollatek AVS is easy to install. Simply plug it in. And compared to repairs or replacements, it costs next to nothing.

For your nearest stockist call Sollatek on +44 (0)1753 688300 or visit www.sollatek.com. Ask about Sollatek uninterruptible power supplies, stabilisers, solar lanterns and charge controllers, too.
